

Ling Sound Daily Listening Check

Name: _____ Who performed Check _____

The goal is to test the student's ability to repeat all of the Ling Sounds with each hearing aid. If s/he wears only hearing aids then a near and far listening condition is needed. If he wears hearing aids + FM then only a far condition is necessary. Near is 3 feet away or arms-length away from the teacher. Far condition is 6-10 feet depending on typical 'far' teacher/student distances in classroom.

Be sure to mix up the presentation order so it is not predictable and to interject a quiet trial to be sure that the student is actually listening, and not guessing. Some sounds like s/sh will be very difficult for many students to differentiate.

Mark + for a yes response and - for lack of a response within the appropriate distance column.
