L.I.F.E Classroom Listening Situations

Instructions: Based on your observations, please mark the response that best describes the student's level of challenge when listening and learning in each of the situations described below. If you have no idea how to answer an item, leave the item blank. Thank you for your assistance.

1. Student’s ability to focus on/follow large group verbal instruction (i.e., teacher front of room):
   - No challenge or very rare
   - Occasionally challenged
   - Sometimes challenged
   - Often/regularly challenged
   - Almost always challenged

2. Student’s ability to focus on/follow verbal instruction when you are moving about the room:

3. Student’s ability to focus on/understand verbal responses by other students seated across the classroom from him/her:
   Check one: □ With FM mic used by student  □ Without FM mic

4. Ability to attend when listening to directions presented to the whole class (focus):

5. Ease of following directions provided to large group (hesitation before beginning work):

6. Ability to attend to class activities (distractibility, fidgety, typical level of attention):

7. Ability to stay on task (re: need for individual redirection):

8. Level of hesitation when volunteering to answer class questions in relation to peers:

9. Ability to answer questions appropriately (shows understanding of question and reasonable response):

10. Ability to understand information presented via instructional media (videos, computer, etc.):

11. Ability to focus on and understand morning announcements or large group assemblies:

12. Ability to attend to verbal instruction and understand when noise is present (i.e., transitions):

13. Ability to focus on/understand peer comments during small group work:

14. Comfort during social involvement/informal peer conversations in comparison to peers:

15. Overall rate of listening/learning in comparison to class peers (rate of comprehension):

Comments: (absences, equipment use problems, etc.)

Self-advocacy for listening and technological needs for students with hearing loss is fundamental for their success in the classroom and beyond. The purpose of this LIFE-R tool is to help the teacher to identify when the student with hearing loss uses self-advocacy strategies in the classroom. Self-advocacy may also be a goal/objective on the student’s IEP, as indicated below by the student’s teacher of the deaf/hard of hearing, educational audiologist or other specialist.

### Student’s IEP goals related to self-advocacy:

<table>
