

## Student Services: One Size **Doesn't** Fit All

### Determining Service Delivery for Students with Hearing Loss can be Tricky

It would be a lot easier if we had one-size-fits-all services for our students with hearing loss, but the law requires we tailor service delivery to every student's individual needs. Student needs cannot be appropriately dictated by degree of hearing loss, hearing technology, their age or any other factor. Only with data can we develop appropriate education plans. This article will review this tailoring process and variables that must be considered. **Read more**

Since students present with varying degrees and types of hearing loss, a full evaluation of the student's strengths and weakness should be completed by a multidisciplinary team that **includes** the Teacher of the Deaf/Hard of Hearing (TODHH). For an example of checklists specific to different team members, look at the [Access to Curriculum Inventory](#). It's critical to know if the student is accessing auditory information in **small and large groups, in noise and in quiet, in ideal acoustical settings and those with the least ideal acoustics** (i.e., the gym or cafeteria). Knowing how well the student follows classroom routines, comprehends auditory directions, and their level of class participation, will help the team determine the time and delivery method for hearing support services. The student's age of identification can help gauge the amount of **language** they may have been exposed to in a natural setting as well as auditory skill development and self-advocacy skill development.

As part of the functional performance testing, the TODHH will do a classroom observation as well as ask the general education teachers, specific questions about the student's **ability to access** classroom information in a **variety** of settings. **This information will impact the decision for service delivery.**

### Considerations:

1. **Student's needs:** academics AND functional performance. It is NOT necessary for a student to have an achievement gap as a sole criterion for adverse educational effect.
2. **Special considerations:** requires the team to look at how and how well a student can communicate with others in the classroom setting, including the impact of the hearing loss on perception of classroom communication at a distance and in background noise.
3. **Does the hearing loss cause an adverse effect to education** (performance in the classroom; achievement)?
4. **Does he/she have the listening, communication repair, self-advocacy skills and self-concept needed to be able to compensate for the access issues caused by the hearing loss and fully participate in the classroom?**

If the student's access issues are a barrier to full participation, then challenges to functional performance in the classroom is likely. Hearing loss results in reduced incidental language learning often resulting in language gaps, including pragmatic language and social interaction issues.

5. **What services (teaching skills) and supports (ensuring access) are needed for the student to receive equal benefit of education in the general education setting?**

Once the team determines the amount of service provision, then the team must determine the appropriate model for service delivery or *type* of service. Some students do better in settings that they are pulled from the general education setting and receive instruction in a 1:1 setting for hearing support. Other students do better in the general education setting with the hearing support teacher co-teaching in an inclusion model. This is all determined by the IEP team once all evaluation information, including the impact of communication barriers, has been reviewed and considered.

The team will make a recommendation for *amount of services*, both **direct** (face time directly with the student) and **indirect service** time that includes monitoring and consultation for the student. TODHH often collaborate with the general education teachers, Speech-Language Pathologists, Educational Audiologists, parents and other staff members as part of their consultation time. When documenting this in the IEP the team must remember to address service time as in **how often**, for **how long** and how the students will be delivered services and location of service.

Once the team makes a decision on service delivery, amount of time per school year, frequency, duration, location and model of services, the team can add that information to the IEP and, if necessary, reconvene to adjust as appropriate.

Take **caution** that you allow enough time to appropriately delivery instruction in the area of need, allow enough time for practicing skills and progress monitoring skills. If the student has a secondary transition plan, be sure to allot time for adequately addressing activities and instruction in secondary transition.

**Consultation** and **monitoring** takes time so be sure to allocate time to email teachers, consult with other professionals, contact the parents and gather data for progress monitoring.

### Sometimes administrators or classroom teachers ask:

- “What does the teacher of the deaf/hard of hearing do that is different from other special ed teachers?” or
- “Why do we really need to involve the teacher of the deaf? The LD teacher or SLP could handle this child’s needs.”

According to the Individuals with Disability Education Act, IDEA Section 300.115

(a) Each public agency must ensure that a **continuum of alternative placements** is available to meet the needs of children with disabilities for special education and related services.

(b) The continuum required in paragraph (a) of this section must–

(1) Include the alternative placements listed in the definition of special education under Sec. 300.38 (instruction in regular classes, special classes, special schools, home instruction, and instruction in hospitals and institutions); and

(2) **Make provision for supplementary services (such as resource room or itinerant instruction)** to be provided in conjunction with regular class placement. (Authority: 20 U.S.C. 1412(a)(5) )

**Only** a Teacher of the Deaf and Hard of Hearing is qualified to interpret the results to the portions of functional hearing assessments that were part of the original evaluation.

**Only** a TODHH can make recommendations for students with hearing loss regarding appropriate service delivery to meet the students’ unique needs related to the impact of hearing loss on access to information.

**Only** a TODHH can ensure that alternative placements in special education are or are not appropriate given the students hearing needs. Therefore, there must be a TODHH on the IEP team making the recommendations for service delivery in a student’s IEP.

## Resources:

**Hearing Itinerant Service Rubric** from District of Lake County Hearing Itinerant Program provides a matrix to assist teams in ensuring students have an adequate amount of time and that the service delivery models are appropriate to meet the students needs. [See PDF here.](#)

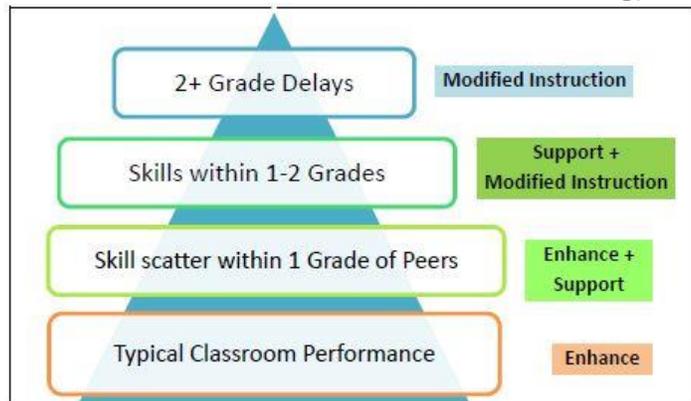

Hearing Itinerant Service Rubric				
Student: _____		School: _____		Grade: _____
Date: _____				
5	4	3	2	1
<b>1. FOLLOWING CLASSROOM ROUTINES:</b>				
Student appears unaware of classroom routines.	Student follows classroom routines with adult assistance.	Student follows classroom routines with prompting.	Student follows classroom routines by observing others.	Student follows classroom routines independently.
<b>2. COMPREHENSION OF CLASSROOM INSTRUCTIONS:</b>				
Student does not comprehend instruction.	Student appears to understand information that is familiar and highly structured.	Student appears to understand information presented in a familiar context and fairly structured.	Student appears to understand most information presented.	Student appears to understand all information presented.
<b>3. PARTICIPATION IN WHOLE-CLASS LESSONS:</b>				
Student is disengaged.	Student does not respond when called on.	Student will answer when called on but response is off-topic.	Student will answer when called on and response is on-topic.	Student volunteers and enriches the discussion.
<b>4. PARTICIPATION IN SMALL GROUP DISCUSSION/COOPERATIVE LEARNING:</b>				
Student is disengaged.	Student is attentive initially but does not participate.	Student is attentive but participation is not productive.	Student is attentive and comments appropriately some of the time.	Student participates consistently and constructively.
<b>5. ACADEMIC PERFORMANCE IN READING, WRITING AND MATH:</b>				
Student is more than 3 years below grade level in Reading.	Student is 3 years below grade level in Reading.	Student is 2 years below grade level in Reading.	Student is Within 1 year of grade level in Reading.	Student is at or above grade level in Reading.
Student is more than 3 years below grade level in Writing.	Student is 3 years below grade level in Writing.	Student is 2 years below grade level in Writing.	Student is Within 1 year of grade level in Writing.	Student is at or above grade level in Writing.
Student is more than 3 years below grade level in Math.	Student is 3 years below grade level in Math.	Student is 2 years below grade level in Math.	Student is Within 1 year of grade level in Math.	Student is at or above grade level in Math.
